

## IFA SUCCESS STORIES

### Nhlanhla & Sibongile Zulu

In 2008, when Nhlanhla and Sibongile Zulu joined the IFA Business, they had well defined goals for the financial future of their Gauteng based family of six.

Their 13 year long journey with IFA has brought about many inspiring milestones for the Zulu family and they have not looked back since. From being able to renovate their home and now owning 6 executive cars, they can attest to the fact that IFA has changed their lives.

One of their most recent milestones is their youngest daughter, Noluthando Zulu receiving a fully paid bursary from IFA in 2019 to study her Bachelors of Accounting Sciences at the University of Witwatersrand.

Educating their four children has always been the Zulu's biggest priority. *"Education is important to us and we want the best for our children."* Mr. Zulu shares. *"When Noluthando was awarded the IFA bursary, it took a huge financial burden off our shoulders because her elder brother was already in university - paying for two tuition fees, and for her younger siblings was going to be very expensive."*

Noluthando who is now in her final year of accounting studies recently received her first car, which was only possible as a result of the extra income her parents earned by growing their IFA business.

*"Receiving the IFA bursary was life changing. It felt good to know that I'm being rewarded for my hard work and that my parents would not have to stress about expensive university fees."* explains an excited Noluthando who is nearing the end of her 3 year undergraduate degree.

The future looks bright for the youngest of the Zulus and she has a lot to be excited about, including her next big move into the corporate world.

*"After completing my degree I plan to do my articles so that I qualify as a Chartered Accountant, it's very exciting"* she concludes.

*We wish  
Noluthando all the  
best as she drives  
her dreams to  
success.*
